Building Inspection and Code Compliance

Fax: 850-623-1208

2007 Florida Statutes, 713.135(6) Application is hereby made to obtain a permit to do the work and installations as indicated. I certify that no work or installation has commenced prior to the issuance of a permit and that all work will be performed to meet the standards of all laws regulating construction in this jurisdiction. I understand that a separate permit must be secured for ELECTRICAL WORK, PLUMBING, SIGNS, WELLS, POOLS, FURNACES, BOILERS, HEATERS, TANKS, and AIR CONDITIONERS, etc.

Time limitation of application: An application for a permit for any proposed work shall be deemed to have been abandoned 180 days after the day of filing, unless such application has been pursued in good faith or a permit has been issued; except that the building official is authorized to grant one or more extensions of time for additional periods not exceeding 90 days each. The extensions shall be requested in writing and justifiable cause demonstrated.

Conditions of Permit: Every permit issued shall become invalid unless the work authorized by such permit is commenced within six (6) months after its issuance or if the work authorized by such permit is suspended or abandoned for a period of six (6) months after the time the work is commenced. Work shall be considered to be in active progress when the permit has received an **approved** inspection within 180 days.

“WARNING TO OWNER: YOUR FAILURE TO RECORD A NOTICE OF COMMENCEMENT MAY RESULT IN YOUR PAYING TWICE FOR IMPROVEMENTS TO YOUR PROPERTY. A NOTICE OF COMMENCEMENT MUST BE RECORDED AND POSTED ON THE JOB SITE BEFORE THE FIRST INSPECTION. IF YOU INTEND TO OBTAIN FINANCING, CONSULT WITH YOUR LENDER OR AN ATTORNEY BEFORE RECORDING YOUR NOTICE OF COMMENCEMENT.”

Effective March 15, 2012, Santa Rosa County will no longer accept the residential balanced return air affidavit. HVAC Contractors will need to ensure compliance with M1602.4 by providing a signed balanced return air distribution data sheet showing the required and final CFMs for each area served or meet one of the following exceptions:

1. Transfer duct may achieve the balanced return air by increasing the return transfer 1-1/2 times the cross sectional area of the supply duct entering the room or space it is serving and the door having at least an unrestricted 1-inch undercut to achieve the proper return air balance.
2. Transfer grills shall use 50 sq inches (of grille area) to 100 CFM (of supply air) for sizing through-the-wall transfer grilles and using an unrestricted 1-inch undercutting of doors to achieve proper return air balance.

Note: Habitable rooms only shall be required to meet these requirements for proper balanced return air excluding bathrooms, closets, storage rooms and laundry rooms, except that all supply air into the master suite shall be included.

Effective immediately we will require a separate inspection for the return air plenum if it is not constructed or sealed at the time of the rough inspection. The mechanical contractor will be responsible for calling in an additional rough inspection. If the return air plenum has not been inspected at the time of the final inspection, if needed we will require the finished elements be removed so that our department can ensure that it is constructed according to code.
